Education

B.Tech in Computer Science & Engineering (CGPA 8.4) (Specialisation in AI with ML) BHARATH INSTITUTE OF HIGHER EDUCATION AND RESEARCH	2020 - 2024 CHENNAI, TAMIL NADU
HSC (74%) ST. PAUL'S MATRICULATION HIGHER SECONDARY SCHOOL	2019 - 2020 NEYVELI, TAMIL NADU
SSLC (90%) ST. PAUL'S MATRICULATION HIGHER SECONDARY SCHOOL	2017 - 2018 NEYVELI, TAMIL NADU

Work Experience

Frontend Developer PEOPLES CONSULTING LLC	Mar 2025 – Present Ohio, USA
* Designed and developed a scalable Childcare Web Application from scratch using React.js, following modular and component-based architecture to ensure maintainability and performance. * Implemented centralized state management using Redux Toolkit and integrated RESTful APIs with Axios for seamless and reliable data flow across multiple application modules. * Built responsive and accessible user interfaces using modern frontend best practices, improving usability and cross-browser compatibility.	
Frontend Developer THIRDVIZION PVT LTD	Aug 2024 – Jan 2025 Chennai, India
• Developed responsive and high-performance web applications using React.js, Tailwind CSS, and Node.js, adhering to clean code and reusable component principles. • Contributed to an AI-powered product by integrating secure authentication using Clerk and managing dynamic content with Strapi CMS for scalable frontend architecture. • Integrated frontend applications with backend services by consuming REST APIs, ensuring efficient data handling and smooth user interactions.	

Projects

NEXTGEN Resume: A Level-3 AI Resume Builder Project with industry-level tech stacks.	Source Code
• A full-stack AI resume builder Project using React.js, Tailwind CSS, Gemini AI, Clerk, Strapi (Headless CMS), and MySQL, delivering secure authentication, responsive UI, and personalized resume management. • Implemented AI-driven resume content generation with REST API-based architecture, focusing on component reusability, performance optimization, and scalable backend data management.	
Kinematic Pose Detection Of Humans Using ML: An ML project	Source Code
* Developed a human kinematic pose detection system using Python, OpenCV, TensorFlow, and pose estimation libraries to detect and track human joint movements from images and video streams. * Implemented machine learning-based pose estimation pipelines, focusing on skeletal keypoint detection, model accuracy, and real-time performance optimization.	

Technical Skills

Languages: Python, Java

Frontend: JavaScript , React, Next Js, Tailwind CSS

DataBase: SQL , MySql

Developer Tools: Postman, VS Code, GitHub, Docker

Backend: Django (Beginner)

Others: Data Structures and Algorithms (Basics–Intermediate) , OOP , Redux , RTK , REST API's , Project Management , Problem Solving , Code Reviews , Reusable Components , Clean Code Principles.

Internships and Certifications

Python Full Stack Development Intern QSPIDERS, CHENNAI	Feb 2024 – Aug 2024 SOURCE CODE
AI with ML Intern ZEPHYR PVT LTD	Jun 2023 – Aug 2023 SOURCE CODE
ML with Python Intern IMMENSPIRE	Mar 2023 – May 2023 SOURCE CODE
